## **Rekluse introduces the z-Start™ Pro Automatic Clutch**

Boise, Idaho – December 7, 2006 - Rekluse Motor Sports is pleased to release the z-Start Pro Clutch. The z-Start Pro offers unique benefits as a high-end compliment to Rekluse's industry leading z-Start Clutch.

The z-Start Pro offers features which directly benefit pro level riders, motocross riders, and any rider looking for the highest level of clutch performance. The z-Start Pro offers the following features:

- Perfect clutch override through the entire RPM range
- Smoother engagement with more consistent clamping force
- Billet aluminum center clutch maximizes clutch performance and increases durability
- Simple installation without mounting shims
- Minimal maintenance required

“The z-Start started a riding revolution by providing an affordable, tunable, high-performance automatic clutch for off-road motorcycle and ATV riders. The z-Start Pro takes the revolution to the next level. We have worked with top level pro riders all over the world and their response has been ‘great performance, but I still need to use my clutch lever at times and have it feel and respond just like the stock clutch lever.’ The z-Start Pro addresses these requests by utilizing a radically new clutch design,” said Al Youngwerth, president of Rekluse Motor Sports. “The z-Start Pro provides stock like control of the clutch with all the benefits of an automatic clutch – better traction, no stalling, and better control during technical riding.”

Rekluse is in the process of releasing the z-Start Pro for the following models:

- Honda 00-07 CR250R, 02-07 CRF450R, and the 04-07TRX450R - Dec
- KTM 03-07 RFS 250/400/450/525 – Feb 07
- Kawasaki 06-07 KX450F – Jan 07
- Yamaha 04-07 YZ250, 03-07 YZ/WR450F, and 04-07 YFZ450 – Jan 07
